DETAILED ACTION

1. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims introduce new matter into the disclosure. The added material which is not supported by the original disclosure is as follows:

a) the step of applying a second force (cl 1) lacks support in the instant disclosure. There is no support for bending at least one finger of the insert by applying a second force greater than a first force. It is clear from the instant specification at pg 6, Ins 11-13 that the fingers "are only bent radially outwardly *after* their insertion into the gasket body during manufacturing of the combustion head gasket" (emphasis). Thus, the fingers cannot be bent by the second force of claim 1.

b) the step of applying a second force (cl 11) lacks support in the instant disclosure. There is no support for bending at least one finger of the insert by applying a second force greater than a first force. It is clear from the instant specification at pg 6, Ins 11-13 that the fingers "are only bent radially outwardly *after* their insertion into the gasket body during manufacturing of the combustion head gasket" (emphasis). Thus, the fingers cannot be bent by the second force of claim 11.

c) the phrase "wherein said predetermined portions...are not shaped by said second force" (cl 13, lns 2-3 of step (e)) lacks support in the instant specification. There is no mention of the predetermined portion being that portion of the blank substrate not shaped by the second force. This negative limitation is not supported by the disclosure.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "an elastomeric sealing bead" (cl 3, ln 2) is indefinite because it is unclear whether or not the bead is the cured elastomeric material of claim 1. If they are the same then it should be positively and clearly recited as such. Also, if they are the same then claim 3 does not further limit claim 1.

Claim 6 is indefinite because a sealing bead is not supplied rather a sealing bead is molded by the supplying and curing steps of claim 1. Also, it should be noted that claim 6 reads as if the bead and the cured elastomeric material of claim 1 are related; however, such relationship has not been positively and clearly recited as such. See the above rejection of claim 3.

Clarification and/or correction is required.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
